according 1907/2006/EC (REACH), 2015/830/EU

pH +

Date: 01 January 2008 Version No. 5 Review date: 03/01/2022

1 SECTION 1: IDENTIFICATION OF THE SUBSTANCE/ MIXTURE AND OF THE COMPANY/ UNDERTAKING

Product identifier

1.1 A. Product name: pH+

Relevant identified uses of the substance or mixture

1.2 and uses advised against Relevant identified uses of the substance or mixture:

pH+ increases the pH in hydroponic nutrient solutions.

Uses advised against:

Any use not specified in this section or in section 7.3

1.3 Details of the supplier of the safety data sheet

Supplier identification Terra Aquatica

Address 4, boulevard du Biopole 32500 FLEURANCE

Phone number +33 (0)5 62 06 08 30

E-mail address info@eurohydro.com

2 SECTION 2 : HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

Reg. 1272/2008/CLP In accordance with Regulation No. 1272/2008 (CLP), the product is considered dangerous.

112

Skin Corr. 1, H314 Eye Dam. 1, H318 Additional information:

Hazards for humans Causes severe skin burns and eye damage.

Enviromental hazards None
Physico-chemical hazards None
Other hazards None

Labelling elements

Labelling according to Regulation (EC) No 1272/2008 [CLP]

Hazard pictograms

Signal word DANGER

Substances Potassium carbonate

Potassium silicate

Hazard statements H: H314 Causes skin burns

H318 Causes serious eye damage.

Precautionary statements P: Ph

Phrases P

P101 If you consult a doctor, keep the container or label available

P102 Keep out of reach of children P103 Read the label before use

P280 Wear protective gloves. Wear eye or face protection. Wear protective clothing.

The product is an aqueous solution containing potassium carbonate and potassium silicate

P314 In case of discomfort, consult a doctor.

P405 - Store under lock and key.

2.3 Other hazards

Description

None

3 SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substances Not applicable

Chemical name

Mixtures
3.2 Name

Potassium Carbonate >10 <20 CAS: 584-08-7

Potassium Silicate >0.3 <1.2 CAS: 1312-76-1

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Weight % content (or range)

4 SECTION 4 : FIRST AID MEASURES

In general, if in doubt or if symptoms persist, seek medical attention. Do not give anything by mouth to an unconscious person.

CAS NUMBER

4.1 Description of first aid measures

Following eye contact Wash immediately with plenty of water for at least 20 minutes, keeping the eyelids well apart, and consult a specialist. If victim is wearing contact lenses, remove them. Following skin contact Wash with plenty of soapy water. Wash impregnated clothing or remove with gloves. Seek medical attention. Following ingestion Do not induce vomiting except under medical advice, seek medical attention immediately by showing the product label. Rinse mouth with water. If victim is conscious, give small amounts of water to drink, unless the victim is nauseated, to prevent vomiting. Following inhalation Call a doctor. Move victim to fresh air. Keep the victim warm and at rest, in a position that allows them to breathe comfortably. If smoke is suspected, the rescuer should wear an appropriate mask or self-contained breathing apparatus. Self-protection of the first Depending on the first aid setting, wear appropriate protective equipment including a mask aider or filtered respirator and, if necessary, operate in the presence of another co-worker. Always wear protective gloves and a resuscitation mask in case of artificial respiration. Wash hands thoroughly after giving first aid. If your clothing becomes contaminated with a chemical during first aid procedures, change it. Other information For further details of first aid administration, including but not limited to more serious health effects, the doctor may consult the Toxicological Information Centre, hotline: see section 1.4 Most important symptoms The pH+ causes irritation, chemical (alkaline) burns of the skin or eyes or degreasing of the and effects, both acute and delayed skin depending on the duration and intensity of exposure. Potassium carbonate is generally considered a safe food additive. Its toxicity is due to its high alkalinity in concentrated form. Indication of any immediate Note to the attending physician

medical attention and special treatment needed 4.3

4.2

Symptomatic treatment required. Immediately contact a specialist for the treatment of poisonings if large quantities have been ingested or inhaled.

Fire water contaminated with this product should be contained and prevented from being

Specific treatments

No special treatment.

5 SECTION 5: FIREFIGHTING MEASURES

	Extinguishing media	The product is not flammable. Fire hazard low due to the flammability characteristics of the
		product under normal storage, handling and use conditions.
		Suitable extinguishing media:
		In the event of a nearby fire or continued combustion, caused by improper handling, storage
5.1		or use, the following extinguishing media may be used: carbon dioxide (CO2), foam,
		chemical powders, and in the event of a widespread fire, also water spray.
		Inappropriate extinguishing media:
	Special hazards arising from the substance or mixture	In case of fire, do not use: Water jet
		The product does not present a risk of fire or explosion under normal conditions of storage,
		handling and use.
		A fire in the surrounding space will often produce thick black smoke.
		Possible thermal decomposition products are carbon dioxide/carbonic gas/

carbon monoxide / metal oxide / metal oxides

Advice for firefighters

Protective actions to be taken when fighting fires

Quickly isolate the site by evacuating all persons from the area near the incident in case of fire. Do not take any action involving a personal risk or in the absence of adequate training. Keep containers away from fire if it can be done without risk. Use water or water spray to

keep containers exposed to fire cool.

5.3 <u>Appropriate protective equipment</u>

The product is not combustible. In the event of a fire in the surrounding area, appropriate extinguishing media and protective equipment may be used for the other materials present (full protective clothing and personal respiratory equipment), in accordance with EN469 for a basic level of protection against chemical incidents. Have a minimum of emergency facilities or intervention elements (fire blankets, medicine kit, etc.) in accordance with Directive 89/654/EC.

Other information

Additional provisions:

Respond in accordance with the Internal Emergency Plan and the Fact Sheets on Accident

and Other Emergency Response. Remove all sources of ignition. In case of

fire, if possible refrigerate containers and storage tanks for products that may ignite and explode as a result of high temperatures. Avoid spilling products used to extinguish the fire

in the aquatic environment.

6 SECTION 6 : ACCIDENTAL RELEASE MESURES

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Quickly isolate the site by evacuating all persons from the area near the incident in case of fire. Do not take any action involving a personal risk or in the absence of adequate training. Keep containers away from fire if it can be done without risk. Use water or water spray to keep containers exposed to fire cool.

For emergency responders

Responders will be equipped with personal protective equipment appropriate to the nature of the hazard. (See Section 8)

Environmental precautions

Avoid contamination of soil, sewers, surface water and groundwater. If this happens, inform the competent authorities.

Methods and material for containment and cleaning up

6.3

6.2

5.4

For containment: Sewer and dike coverage

For cleaning up:

Restrict access; isolate the risk area and prevent entry. Do not touch or walk through spilled liquid. If possible, eliminate the leak. Prevent entry into storm sewers or waterways. If possible, isolate, dam or dike and try to capture the equipment. Suction with a pump or

vacuum truck. Use non-combustible absorbent material, such as sand, earth, vermiculite or diatomaceous earth. Contaminated absorbent material may present the same hazard as the spilled product. If it is impossible to contain the material, dilute with large amounts of water. Dispose through a licensed waste disposal contractor. Comply with environmental laws for waste disposal.

Other information:

Do not put the spilled product in contact with combustible or incompatible materials. Cleaning personnel must wear equipment to protect skin and eyes and to protect themselves from vapours

Reference to other sections

6.4

7.1

7.2

8

8.1

Collect the remains in an identified container: see point 13 for disposal.

Personal protective equipment: see section 8 Withdrawal considerations: see section 13.

See section 1 for emergency contact information.

SECTION 7: HANDLING AND STORAGE

Precautions for safe handling

Wear appropriate personal protective equipment (see section 8). Do not get in eyes, on skin or clothing. Do not breathe vapours or mist. Do not ingest. If during normal use the product presents a respiratory hazard, use only with adequate ventilation or wear suitable respiratory equipment. Store in original container or an approved substitute made of compatible material, tightly closed when not in use. Keep away from acids. Empty containers retain product residue and may be hazardous. Do not reuse the container. General Recommendations:

Keep away from flames and sparks. Do not smoke. Keep away from heat and other sources of ignition.

Do not eat, drink or smoke in work areas.

Wash hands after each use.

Conditions for safe storage, including any incompatibilities

Store in original container, out of direct sunlight, in a cool, dry, well-ventilated area, away from incompatible materials (see section 10) and food and drink. Store under lock and key. Store separately from acids. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully closed and kept in an upright position to prevent leakage. Do not store in unlabelled containers. Use an appropriate containment method to avoid environmental contamination.

Close containers before and after each use to avoid sources of moisture or heat. Store in areas with waterproof pavement.

7.3 Specific end use(s)

No specific end uses.

SECTION 8: EXHIBITION CONTROLS/INDIVIDUAL PROTECTION

Control parameters

No applicable.

Respect good industrial hygiene practices

8.2 Exposure controls

Appropriate engineering controls

If user operations generate dust, fumes, gases, vapours or mist, use local exhaust ventilation or other engineering controls to keep worker exposure to air contaminants below recommended or regulatory limits.

Individual protection measures, such as personal protective equipment

Use individual protection placed on the market in accordance with the provisions of Regulation (EU) 2016/425 of the European Parliament and of the Council of 9 March 2016.

Personal protective equipment must be adapted to the risk, kept clean and properly

maintained in compliance with the provisions of the labour code.

Eye/face protection It is necessary to wear protective goggles complying with standard NF EN166 before

handling chemicals.

Skin protection Hands: Wear suitable protective gloves in case of prolonged or repeated contact with the

product. Use suitable protective gloves resistant to chemical agents in accordance with NF

EN374.

Respiratory protection Ensure adequate ventilation, especially in enclosed areas. If a risk assessment

recommends it, wear appropriate respiratory equipment.

Body protection Wear appropriate protective clothing.

After contact with the product, all parts of the body that have been in contact with the

product must be washed.

13.1

14.1

No known significant effects or critical hazards.

SECTION 13: DISPOSAL CONSIDERATIONS

Waste treatment methods

Do not flush to sewers or waterways.

Waste: Waste management shall be carried out without endangering human health and without harming the environment, and in particular without creating a risk to water, air, soil, fauna and flora.

Recycle or dispose of in accordance with current legislation, preferably by a licensed

collector or company.

Disposal of the product/packaging: Disposal into sewers or waterways is prohibited. Residues and empty containers must be handled and disposed of in accordance with the relevant local/national legislation in force.

Follow the provisions of Directive 2008/98/EC on waste management.

Packaging: The generation of waste should be avoided or minimised as far as possible. Packaging waste should be recycled. Incineration or burial should only be considered when recycling is not possible.

16.4 Note

This safety data sheet complies with the requirements laid down in Reg. 830/2015/EU. It does not in any way exempt the user from knowing and applying all the documents that govern his activity. The user will take under his responsibility the precautions related to the specific use of the product. All the regulatory requirements mentioned are simply intended to help the recipient to assume his responsibilities. This list should not be considered exhaustive. This data sheet supplements the technical instructions for use but does not replace them. The information in this safety data sheet has been compiled by Terra Aquatica on the basis of its current knowledge (safety data sheet for the active ingredients compiled by the manufacturer and other bibliographical data) as of the date indicated. It is given in good faith. In addition, the user's attention is drawn to the possible risks involved when a product is used for purposes other than those for which it was created. The recipient must ensure that he is not liable for anything other than what is stated in the texts other than those mentioned.

The information describes the safety aspects of the product. It is not intended to guarantee specific properties.

It is the responsibility of our customers to observe the applicable regulations.
