Natural Kleaner

Leaf Cleaner

A film-forming formulation for effective cleaning of foliage and physical encapsulation of insects present on the leaf surface.

Composition

Organic product made from alpha-D-glucopyranoside and water. Natural, vegan, biodegradable.

- Compatible with the entire Terra Aquatica range.
- Fully compatible with most fertilisers and additives.
- Biodegradable formula that is gentle on plants and the environment.
- **Non-toxic.**

Gains

For plants

- Forms an adhesive film that helps trap insects on the foliage and facilitates their physical removal.
- Effectively cleans leaves.
- Removes dust, deposits, residues, and impurities.
- Helps keep foliage clean in the face of external stressors.
- Preserves the natural luster of the foliage.
- Promotes uniform wetting of the leaf surface.

How does it work?

A formula based on alpha-D-glucopyranoside, it possesses surfactant properties that help lift and disperse impurities from the leaf surface.

- Thanks to its surfactant and film-forming properties, the product forms an adhesive film upon contact with organisms present on the leaf surface, helping to immobilize and physically remove them.
- An effective, gentle, and biodegradable cleaning formula.
- Promotes even distribution of the solution across the foliage.
- Regular cleaning thus helps maintain a clean and functional leaf surface.

Areas of uses

- Vegetable farming (greenhouses, tunnels),
- Indoor crops, ornamental plants.

Helps maintain foliage and preserve the plant's natural health.

Doses

Spray Application

25 ml (approx. 3 capfuls) / L

Shake the bottle before use.
Dilute in clean water, then spray evenly onto the leaves.

Use during installation, planting, and throughout the growing season.

May be used up to one day before harvest.
No rinsing required before harvest.

Artificial lighting: Apply the product a few minutes before turning off the lights.

Natural light: Apply very early in the morning or at the end of the day; avoid direct sunlight at the time of application.

Deep cleaning: Apply **every other day** until the desired result is achieved

Maintenance cleaning: Apply **every one to two weeks**.

Recommandations

- Do not spray in direct sunlight or in high heat.
- **Conduct a preliminary test on one or two plants** before applying to the entire area, especially on sensitive species.
- Cleaning product: Wait 24 hours before introducing predators for biological control.
- Store in the original container in a dry, cool place (5°C–30°C) away from direct sunlight. Close the container tightly after use.
- Use within 6 months of opening.
- Recycle the container according to current recycling guidelines.
- Keep out of reach of children.
